1 Introduction

Some stuff to be introduced.

1.1 Research question

Research question

Will my research question make any sense?

2 Data and methods

Table 1: Some variables

Variable	Role	Definition
1	hm	hm
2	hm	hm
3	hm	hm

3 Analysis

Just to see how the code blocks appear.

```
ducks = pd.DataFrame({
    "lamp": ["Still", "Still", "Swiveled", "Swiveled"],
    "seconds": [12, 14, 9, 11],
})

mean_times = ducks.groupby("lamp")["seconds"].mean()
for lamp, seconds in mean_times.items():
    print(f"{lamp}: {seconds:.1f} seconds")
```

```
Still: 13.0 seconds
Swiveled: 10.0 seconds
```

4 Discussion

Some stuff to be discussed.
